

Directions for Lotto

THE GAME You will need enough Lotto Game Cards for the number of children who will participate. The Lotto cards are provided as word or picture cards on the *Lesson Resources CD*. We recommend printing them on card stock if possible. Typically there are between two and four players per game. The players' boards should all be different from one another.

There are three Lotto game boards provided on the CD: one with 9 squares, one with 12 squares, and one with 16 squares.

9 squares

12 squares

The letters, pictures, or words are placed randomly in the boxes of each card. All of the cards are different from one another. You can make a free space for each card.

The letters, pictures, or word cards are appropriate to the game that players will use to match to their squares on the game card. Have plastic chips or some other way for players to mark the boxes on their game cards.

You can also make your own game cards. See the Custom Card/Game Maker on the CD.

PLAYING THE GAME Give each player a game card. Place the letter, picture, or word cards and the plastic chips or other markers in the middle of the table.

Players take turns drawing a card and saying what it is. All players search their game cards for a corresponding letter, picture, or word. They can mark any spaces that correspond.

For *Lotto*, the first player to cover the entire board wins the game. The game can then continue until others fill their cards if desirable. For the *Bingo* version, the player who covers one row across, down, or diagonally wins the game.
